Make in **India**  
for India and  
for the **World**

In pursuit of excellence,  
to be the best

### Vision

To be the preferred source for seats, foams, components and sub-system parts in the commercial vehicle industry and adjacencies.

### Mission

We will enhance customer delight with excellence in design, manufacturing, and services.

We will leverage efficiencies in the deliverables to exceed customer expectations on comfort, safety, quality, and reliability.

We will create a high-performance organization with sustained growth.

### About Us

**StellarSP** is a SME auto component manufacturing company, based at Bengaluru, Karnataka, India.

**StellarSP**, is a Seating Solutions provider and has set up a new green field manufacturing facility in 2021 at Bengaluru.

We have in-house integrated facilities for PU foam, welding lines, and assembly lines.

We have the capabilities in design, development, manufacturing and supply of bus passenger seats and PU molded foams.

**StellarSP** manufacturing activities are focused on building efficiencies across processes, product quality and delivery commitments.

We strive to deliver cost-effective product solutions, best-in-class comfort and responsive customer support services.

We continue to focus on leveraging innovation to develop comfortable seating systems for passenger transport.

The products are designed for structural reliability and ergonomic contour to suit the Indian road conditions and demography.

We meet the customer expectations on comfort in travelling by providing a safe travel experience.

Our futuristic solutions would be based on light-weighting and alternate materials for meeting the innovative transport solutions.

Future growth is planned with Driver seats, Foam components, and Seating sub-system parts for commercial vehicles

### Highlights

- Seating products for public transportation buses and EV mobility.
- PU molded foams for seats and sleeper berths.
- Plastic seats for buses and boats.
- Sub systems and components for commercial vehicle applications.
- Design solutions for seating applications.
